Hello Gregory,
On what set is the function $f(x) = \sqrt{(x-2)(x+3)}$ defined?
Durand Gregory 2013-11-29 12:48:37
on $]-\infty ; -3] \cup [2 ; +\infty[$

More you should see:

- Work on a live shared document,
- Using the supervised mode: the leader chooses the person that has the control to write on chat or live document,
- Use the ordered mode : anyone may ask for the control at anytime ; the control is given respecting the order of the demands.

Tip:

- You can paste images in the chat and live documents

More tips:

-You may mask your presence (indicated in the list of documents),

-You can copy a text containin g email addresses to propose to some people to become a contact with EpsilonChat (see the manual),

-You can change your password on : http://epsilon-publi.net

-You can own several account on http://epsilon-publi.net ; you have to use different email addresses.
